

### **Panel Questions Set 3**

1. What are the OOI plans and commitments for interagency and international partnerships?
2. Are there economies of scale in procurement and implementation of the three sets of moorings, given the same base design and sensors? Can the procurements be coordinated to achieve cost savings?
3. Are there intellectual property or patent issues that can arise from the infrastructure development? If so, how is this accounted for in the IO and OL management?
